

CAPITAL REGIONAL DISTRICT - INFRASTRUCTURE & WATER SERVICES

Water Watch for August 23, 2026

Water Supply System Summary:

1. Useable Volume in Storage:

Reservoir System	August 31 5 Year Ave	August 31/25	August 23/26	% Existing Full Storage
	ML ¹	ML ¹	ML ¹	
Sooke	67,827	65,214	66,009	71.2%
Goldstream*	7,878	7,773	7,738	78.0%
Total	75,704	72,986	73,747	71.8%

* Goldstream System is the emergency backup water supply for the Greater Victoria Region

¹ML = Million Litres

2. Average Daily Demand:

For the month of August	208.1 MLD ²
For week ending August 23, 2026	198.9 MLD ²
Max. day August 2026, to date:	236.3 MLD ²

3. Average 5 Year Daily Demand for August

Average (2021 - 2025)	202.5 MLD ²
	² MLD = Million Litres Per Day

4. Rainfall August:

Average (1914 - 2025):	29.1 mm
Actual Rainfall to Date	6.8 mm (23% of monthly average)

5. Rainfall: Sep 1- Aug 23

Average (1914 - 2025):	1,621.2 mm
2025/2026	1,659.2 mm (102% of average)

6. Water Conservation Required Action:

Did you know that the 2024 change to the Water Conservation Bylaw recommends that landowners and residents switch timing of residential irrigation systems from 4:00 am to an expanded window anytime between 12:01 am to 10:00 am on established watering days? Please go to Water Conservation Bylaw Changes | Capital Regional District to get informed and do your part to help protect our regional water supply system.

SOOKE LAKE RESERVOIR STORAGE SUMMARY

2025 / 2026

The map displays the Sooke and Goldstream Watersheds, highlighting several reservoirs and their storage levels. The Sooke Watershed is shown in green, and the Goldstream Watershed is shown in orange. The map includes callouts for Deception Gulch Reservoir, Sooke Lake Reservoir, Butchart Lake Reservoir, Lubbe Lake Reservoir, Goldstream Lake Reservoir, and Japan Gulch Reservoir. Each callout includes a bar chart showing the current volume and a line graph showing the full storage and 5-year average.

Deception Gulch Reservoir (Fisheries Storage)

Category	Volume (million litres)
Full Storage	4,000
5 Year Average	2,252
Current Volume	2,252

Sooke Lake Reservoir

Category	Volume (million litres)
Full Storage	100,000
5 Year Average	66,009
Current Volume	66,009

Butchart Lake Reservoir

Category	Volume (million litres)
Full Storage	100,000
5 Year Average	66,009
Current Volume	66,009

Lubbe Lake Reservoir

Category	Volume (million litres)
Full Storage	100,000
5 Year Average	66,009
Current Volume	66,009

Goldstream Lake Reservoir

Category	Volume (million litres)
Full Storage	10,000
5 Year Average	7,738
Current Volume	7,738

Japan Gulch Reservoir

Category	Volume (million litres)
Full Storage	10,000
5 Year Average	7,738
Current Volume	7,738

Sooke Lake Reservoir Storage Level

Water Supply Management Plan

FAQs

How are water restriction stages determined?

Several factors are considered when determining water use restriction stages, including,

1. Time of year and typical seasonal water demand trends;
2. Precipitation and temperature conditions and forecasts;
3. Storage levels and storage volumes of water reservoirs (Sooke Lake Reservoir and the Goldstream Reservoirs) and draw down rates;
4. Stream flows and inflows into Sooke Lake Reservoir;
5. Water usage, recent consumption and trends; and customer compliance with restriction;
6. Water supply system performance.

The Regional Water Supply Commission will consider the above factors in making a determination to implement stage 2 or 3 restrictions, under the Water Conservation Bylaw.

At any time of the year and regardless of the water use restriction storage, customers are encouraged to limit discretionary water use in order to maximize the amount of water in the Regional Water Supply System Reservoirs available for nondiscretionary potable water use.

Stage 1 is normally initiated every year from May 1 to September 30 to manage outdoor use during the summer months. During this time, lawn watering is permitted twice a week at different times for even and odd numbered addresses.

Stage 2 Is initiated when it is determined that there is an acute water supply shortage. During this time, lawn water is permitted once a week at different times for even and odd numbered addresses.

Stage 3 Is initiated when it is determined that there is a severe water supply shortage. During this time, lawn watering is not permitted. Other outdoor water use activities are restricted as well.
