### **2022 Regional Greenhouse Gas Inventory**

The CRD Board received a report on the 2022 Regional Greenhouse Gas Inventory. The CRD completes regional and local government greenhouse gas emission inventories every two years. Results for the regional inventory for the 2022 calendar year indicate an approximate 7% decrease in regional emissions from 2007 to 2022, and a 1% increase from 2020. This trend varies between the municipalities and electoral areas within the capital region. The CRD Board directed staff to present new innovative and ambitious options and measures to reduce this trend in future years and achieve our existing 2038 emissions target.
