7. COMMISSION BUSINESS

7.1. Juan de Fuca System Expansion – Skirt Mountain – Tender Recommendation

J. Marr spoke to Item 7.1.

Discussion ensued regarding:

- This being the last part of the development cost charges projects on Skirt Mountain.
- Budget increased at the December 7, 2021 meeting and this project comes in under the revised budget amount.

The Commission noted the importance of providing adequate reservoir systems throughout the whole region, and how staff are proactively accommodating the increasing population.

Commissioner Szpak expressed appreciation on behalf of the City of Langford for the support that the Commission has shown for this area of the community.

MOVED by Commissioner Baird, **SECONDED** by Commissioner Rogers,
That the Juan de Fuca Water Distribution Commission approves the award of Contract 2021-723, Juan de Fuca System Expansion – Skirt Mountain, to Coast Utility in the amount of \$6,673,803 plus GST.

CARRIED

7.2. Goldstream Avenue Water Main Project Update

T. Robbins spoke to Item 7.2.

Discussion ensued regarding:

- Implications for City of Langford related to this project not being able to be conducted concurrently with City of Langford ongoing construction works.
- Future price increase implications.
- Standing offer time lines.
- Potential for purchasing materials at current market costs and storing them until the project is re-bid.
- Complexity of the project and hours of work being a significant limitation that will drive cost and will have to be addressed.
- Uncertainty related to fluctuating materials pricing, staff will re-evaluate in early 2023.

MOVED by Commissioner Rogers, **SECONDED** by Commissioner Baird,
That the Juan de Fuca Water Distribution Commission receives this report for information.

CARRIED

**REPORT TO JUAN DE FUCA WATER DISTRIBUTION COMMISSION
MEETING OF TUESDAY, JULY 5, 2022**

SUBJECT Rocky Point Water Upgrade Budget Amendment

ISSUE SUMMARY

The Juan de Fuca Water Distribution Service 2022 capital plan and budget requires amendment as a result of additional work required on the Rocky Point Water Upgrade Project.

BACKGROUND

As reported to the Juan de Fuca Water Distribution Commission on September 7, 2021, the total approved budget for the Rocky Point Water Upgrade project, as per the capital plan, was \$9,314,000. This project is cost-shared with the Federal government and in March of 2021, the Capital Regional District (CRD) entered into a Contribution Agreement with the Department of National Defence (DND) to provide funding for construction and construction phase engineering services.

A breakdown of the current budget is as follows:

Project Name & Budget No.	Engineering Design Phase Budget	Engineering Construction Phase Budget	Construction Budget	Total Budget	Funding Source	
					CRD	DND
Rocky Point Water Upgrades No. 18-05	\$408,000	\$367,000	\$8,539,000	\$9,314,000	\$3,550,000	\$5,764,000

After tender award and consultation with Scia'new First Nation (Beecher Bay), additional archeological and environmental monitoring is required to be undertaken within the DND funding portion of the work. DND has fully committed to funding this work, however the CRD is administering the project and therefore must revise the 2022 capital plan. The cost of the archeological and environmental monitoring is approximately \$358,000 and \$53,000 respectively totaling \$411,000.

A breakdown of the revised budget is as follows:

Project Name & Budget No.	Engineering Design Phase Budget	Engineering Construction Phase Budget	Revised Construction Budget	Revised Total Budget	Revised Funding Source	
					CRD	DND
Rocky Point Water Upgrades No. 18-05	\$408,000	\$367,000	\$8,950,000	\$9,725,000	\$3,550,000	\$6,175,000

ALTERNATIVES

Alternative 1

The Juan de Fuca Water Distribution Commission recommends to the Capital Regional District Board:

That the 2022 Juan de Fuca Water Distribution Service capital plan and Project 18-05, Rocky Point Water Upgrades, budget be amended to \$9,725,000 to reflect an increase in Federal funding of \$411,000 for the additional archeological and environmental monitoring costs.

Alternative 2

That the budget amendment request not be approved and that the matter be directed back to staff.

IMPLICATIONS

Financial Implications

The budget amendment requested is being funded 100% by DND and will not have any impact on the Juan de Fuca Water Distribution Service capital plan.

Service Delivery Implications

Should the budget amendment not be approved, then the project would be at risk of a funding shortfall which may impact final project delivery.

CONCLUSION

Additional archeological and environmental monitoring is required to be undertaken on the DND portion of the Rocky Point Water Upgrades project. As a result of the additional work, a budget amendment to the 2022 Juan de Fuca Water Distribution Service capital plan is required. The cost of this additional work is estimated at \$411,000 and will be 100% funded by DND.

RECOMMENDATION

The Juan de Fuca Water Distribution Commission recommends to the Capital Regional District Board:

That the 2022 Juan de Fuca Water Distribution Service capital plan and Project 18-05, Rocky Point Water Upgrades, budget be amended to \$9,725,000 to reflect an increase in Federal funding of \$411,000 for the additional archeological and environmental monitoring costs.

Water Supply Management Plan

FAQs

How are water restriction stages determined?

Several factors are considered when determining water use restriction stages, including,

1. Time of year and typical seasonal water demand trends;
2. Precipitation and temperature conditions and forecasts;
3. Storage levels and storage volumes of water reservoirs (Sooke Lake Reservoir and the Goldstream Reservoirs) and draw down rates;
4. Stream flows and inflows into Sooke Lake Reservoir;
5. Water usage, recent consumption and trends; and customer compliance with restriction;
6. Water supply system performance.

The Regional Water Supply Commission will consider the above factors in making a determination to implement stage 2 or 3 restrictions, under the Water Conservation Bylaw.

At any time of the year and regardless of the water use restriction storage, customers are encouraged to limit discretionary water use in order to maximize the amount of water in the Regional Water Supply System Reservoirs available for nondiscretionary potable water use.

Stage 1 is normally initiated every year from May 1 to September 30 to manage outdoor use during the summer months. During this time, lawn watering is permitted twice a week at different times for even and odd numbered addresses.

Stage 2 is initiated when it is determined that there is an acute water supply shortage. During this time, lawn water is permitted once a week at different times for even and odd numbered addresses.

Stage 3 is initiated when it is determined that there is a severe water supply shortage. During this time, lawn watering is not permitted. Other outdoor water use activities are restricted as well.
