

CAPITAL REGIONAL DISTRICT - INFRASTRUCTURE & WATER SERVICES

Water Watch for September 27, 2026

Water Supply System Summary:

1. Useable Volume in Storage:

Reservoir System	September 30 5 Year Ave	September 30/25	September 27/26	% Existing Full Storage
	ML ¹	ML ¹	ML ¹	
Sooke	62,398	59,408	58,190	62.8%
Goldstream*	7,579	7,268	7,095	71.6%
Total	69,977	66,676	65,285	63.6%

* Goldstream System is the emergency backup water supply for the Greater Victoria Region

¹ML = Million Litres

2. Average Daily Demand:

For the month of September	177.4 MLD ²
For week ending September 27, 2026	158.5 MLD ²
Max. day September 2026, to date:	204.4 MLD ²

3. Average 5 Year Daily Demand for September

Average (2021 - 2025)	166.3 MLD ²
	² MLD = Million Litres Per Day

4. Rainfall September:

Average (1914 - 2025):	65.3 mm
Actual Rainfall to Date	26.8 mm (41% of monthly average)

5. Rainfall: Sep 1- Sep 27

Average (1914 - 2025):	54.9 mm
2025/2026	26.8 mm (49% of average)

6. Water Conservation Required Action:

Did you know that the 2024 change to the Water Conservation Bylaw recommends that landowners and residents switch timing of residential irrigation systems from 4:00 am to an expanded window anytime between 12:01 am to 10:00 am on established watering days? Please go to Water Conservation Bylaw Changes | Capital Regional District to get informed and do your part to help protect our regional water supply system.

SOOKE LAKE RESERVOIR STORAGE SUMMARY

2025 / 2026

Useable Reservoir Volumes in Storage for September 27, 2026

Sooke Lake Reservoir Storage Level

Water Supply Management Plan

FAQs

How are water restriction stages determined?

Several factors are considered when determining water use restriction stages, including,

1. Time of year and typical seasonal water demand trends;
2. Precipitation and temperature conditions and forecasts;
3. Storage levels and storage volumes of water reservoirs (Sooke Lake Reservoir and the Goldstream Reservoirs) and draw down rates;
4. Stream flows and inflows into Sooke Lake Reservoir;
5. Water usage, recent consumption and trends; and customer compliance with restriction;
6. Water supply system performance.

The Regional Water Supply Commission will consider the above factors in making a determination to implement stage 2 or 3 restrictions, under the Water Conservation Bylaw.

At any time of the year and regardless of the water use restriction storage, customers are encouraged to limit discretionary water use in order to maximize the amount of water in the Regional Water Supply System Reservoirs available for nondiscretionary potable water use.

Stage 1 is normally initiated every year from May 1 to September 30 to manage outdoor use during the summer months. During this time, lawn watering is permitted twice a week at different times for even and odd numbered addresses.

Stage 2 Is initiated when it is determined that there is an acute water supply shortage. During this time, lawn water is permitted once a week at different times for even and odd numbered addresses.

Stage 3 Is initiated when it is determined that there is a severe water supply shortage. During this time, lawn watering is not permitted. Other outdoor water use activities are restricted as well.
